Incidents involving involuntary seclusion by a person not trained in its use	0

4. Involuntary Seclusion Rooms

Not applicable. Cornerstone Valley reported no involuntary seclusion, no locked-room seclusion, and no rooms used or available for involuntary seclusion during this reporting period.

5. Steps Taken to Decrease the Use of Restraint and Involuntary Seclusion

Cornerstone Valley reported no involuntary seclusion during this period. The Q1 workbook documented the following child-specific steps intended to decrease restraint use:

- Staff retraining to a child's PBSP was documented for 1 child.
- PBSP updates were documented for 2 children.
- An FBA update was documented for 1 child.
- Consultation with a psychiatrist or medication prescriber was documented for 1 child.
- A schedule change was documented for 1 child.

Documented Individual-Level Actions

The source workbook documented the following individual-level actions during the quarter. A single child may be represented in more than one category.

Action documented	Number of children
Staff retrained to the child's PBSP	1
General staff retraining	0
FBA updated	1
PBSP updated	2
Consultation with psychiatrist or medication prescriber	1
Environmental change to a child's bedroom	0
ISP team convened	0

Data note: This public-facing report summarizes the redacted quarterly workbook for January 1 through March 31, 2026. Individual identifiers are not included. Counts of children represent unique children, while restraint totals represent reported restraint incidents.
