White	26	10
Other	0	0

Identified Gender

Demographic characteristic	All children served	Children restrained
Male	19	8
Female	12	4
Gender neutral / non-binary / other	0	0

Biological Gender

Demographic characteristic	All children served	Children restrained
Male	19	8
Female	12	4

Primary Language

Demographic characteristic	All children served	Children restrained
English	30	11
Vietnamese	1	1
Other	0	0

Migrant Status

Demographic characteristic	All children served	Children restrained
U.S. citizen	31	12
Other migrant/immigration status	0	0

Augmentative Communication

Demographic characteristic	All children served	Children restrained
Uses augmentative communication device	9	5
Does not use augmentative communication device	22	7

Economic Status

Demographic characteristic	All children served	Children restrained
Economically disadvantaged	31	12
Not economically disadvantaged	0	0

3. Restraint and Involuntary Seclusion Information

Required reporting item	Count
Total number of incidents involving restraint	58
Total number of incidents involving involuntary seclusion	0
Restraint incidents resulting in a reportable injury	0
Involuntary seclusion incidents resulting in a reportable injury	0
Involuntary seclusions in a locked room	0
Rooms used or available for involuntary seclusion	0
Children in care placed in restraint	12
Children in care placed in involuntary seclusion	0

Required reporting item	Count
Children who experienced both restraint and involuntary seclusion	0
Children placed in restraint more than three times	6
Children placed in involuntary seclusion more than three times	0
Incidents involving restraint by a person not certified in the type of restraint used	0
Incidents involving involuntary seclusion by a person not trained in its use	0

4. Involuntary Seclusion Rooms

Not applicable. Cornerstone Valley does not use involuntary seclusion and does not maintain or designate any room for involuntary seclusion. The number of seclusion incidents, locked-room seclusions, and rooms available for seclusion were all reported as zero for this reporting period.

5. Steps Taken to Decrease the Use of Restraint and Involuntary Seclusion

The Q3 source workbook reports no involuntary seclusion. It documents multiple child-specific actions intended to decrease restraint use, including staff retraining, FBA and PBSP updates, ISP-team meetings, schedule and protocol changes, environmental changes, and consultation with health-care providers.

- The source workbook records child-specific restraint totals and the actions documented during the reporting period.
- Staff retraining to a child's PBSP and general staff retraining were documented for children during the quarter.
- FBA and PBSP updates were documented for children during the quarter.
- ISP-team meetings and consultation with medication prescribers or other health-care providers were documented for children during the quarter.
- Schedule changes, protocol changes, and environmental changes were documented for children during the quarter.
-
-

Documented Individual-Level Actions

The source report documented the following individual-level actions during the quarter. A single child may be represented in more than one category.

Action documented	Number of children
Staff retrained to the child's PBSP	11
General staff retraining	6
FBA updated	4
PBSP updated	4
Consultation with psychiatrist or medication prescriber	4
Environmental change to a child's bedroom	1
ISP team convened	5
Changes made to the child's schedule	5
Environmental change to the setting interior	1
Environmental change to the setting exterior/property	1
Changes made to the child's protocols	1
Consultation with primary care physician or dentist	1

Data note: This public-facing report summarizes the completed ODDS Q3 workbook for July 1 through September 30, 2026. Individual identifiers are not included. Counts of children represent unique children, while the restraint total reflects restraint incidents recorded in that workbook.
